# MINING, BUSINESS AND STOCKS

# MANHATTAN CAMP VERY PROSPEROUS

Nearly All Mines Are Doing Well And Many Promise Rich Rewards.

#### QUARTZ IS HIGHLY OXIDIZED.

High and Low Grade Ore in Quantity, And With Advent of Milling Facilities Much is Expected.

(Special to the "News.") Manhattan, Nev., Nov. 13 .- Few

mines in the Manhattan mining district are being worked under more prosperous conditions than is the property of the Manhattan Consolidated Extension company, located in the east end of the pay belt and in proximity to the great Consolidated mine and the Pine Nut estate. The manage. ment is utilizing a tunnel as a means of exploration and at a point 88 feet in from the entrance has opened up a ledge which is showing 66 feetin width. Exclusive of a horse that cuts out values across a width of 10 feet, the cattre deposit is a commercial product with the advent of milling facilities and a portion of the ledge could be brought up to shipping grade by careful sorting. The quartz is highly oxi-dized, crumbles readily beneath the pressure of the hand and is so amenable to the efforts of the miners that o large tonnage is being broken down daily.

#### SAMPLES PAN WELL.

Better than 4,000 tons of the product are now piled upon the dump all of which is estimated to have a value of at least \$20 to the ton. Samples taken at random from any portion of the dump invariably pan well and frequently leave a string of colors which indicate high grade shipping ore. No attempt is made, however, to segregate this class of quartz from its less valuable neighbor as it is the intenvaluable neighbor as it is the inten-tion of the company to hold the prod-uct in its entirety until such time as

uct in its entirety until such time as adequate milling facilities are at hand, when it is to go under the stamps.

In the drift run out on this huge ledge at a depth of 44 feet in the winze sunk in the tunnel floor the miners are working in ore which shows considerable free gold and some sulphides. At this point the quartz is much harder than where opened above and presents every indication of permanency. Pockets are occasionally manency. Pockets are occasionally encountered which are filled with uncoined gold and from which specimen of rare beauty and value are taken. The average grade across eight feet of the deposit at the present point of development is \$32 the ton.

#### TO INSTALL PLANT.

Plans are now being formulated to equip the property with a large plant of machinery which is to be erected south of the tunnel entrance and on south of the tunnel entrance and it is the opposite side of the gulch. It is 50 horsepower and is operated by steam. As soon as it is in place a deep double compartment main working shaft will be sunk well down into the permanent ore zone.

Development of the Crow claim of the Manhattan Mustang Annex Mining

company is progressing favorably un-der the supervision of J. P. Murphy, der the supervision of J. P. Murphy, formerly a successful leaser at Cripple Creek and known locally as the man who first opened up ore on the April Fool claim of the Seyler-Humphrey company. Murphy is engaged in sinking a shaft to a depth of 50 feet and the objective mark is being neared. The bottom of the shaft now shows marked mineralization and the rock The bottom of the shaft now shows maraked min-ralization and the rock is making into quartz. When Murphy first examined the property he stated that in his opinion a large body of ore would be found at some point between grass roots and the 50 foot point and it appears probable that his prediction is to be verified. He intends to cut a station at that denth tends to cut a station at that depth and to then crosscut to and drift on

#### DEVELOPE AT DEPTH.

On the company's Sunset claim, ad-joining the Detroit and Way Up claims on Litigation Hill, one of the richest portions of the Manhattan pay belt, arrangements are beng made to de-various ledges may be tested and of the acreage is to be thoroughly proof the acreage is to be thoroughly prospected at surface in order that the velope at depth. In furtherance therethe more favorable place at which to sink a deep main working shaft be selected. Some very valuable float has been picked up on these claims and from the vein system very encouraging assays and pannings are obtained at surface and at nominal depth. From the dip of the ledges it appears as though they will make into one immense ore body at a depth not exceeding 200 feet.

WILL COMMENCE CROSSCUTTING. Mineral conditions on the property of the Manhattan Express Mining company have improved materially since the main working shaft passed through the lava flow which caps that section of the camp. The formation now be-ing pierced shows marked signs of mineralization and presents indications of the presence of an ore body near at hand. It is the purpose of the management to crosscut over to the ledges when a little further depth has been gained. Very encouraging pannings are being secured from the vein matter in the shaft.

Following closely on the heels of the

announcement of a strike of paramount importance in the Manhattan Cousolidated property comes the news of the finding of a body of milling ore on the Manhaitan Red Top company's acreage, located north of the Consolidated and separated therefrom by the estate of the Manhaitan Consolidated Extensions of the Manhaitan Consolidated Extensions. ston company. The ore body is three feet in width and "breaks" at the rate of from \$20 to \$30 in gold to the ton, the larger portion of the ledge returning the higher values.

LEDGES BEING FOLLOWED.

The find was made by Superintendent George Cram at a point 160 feet in from the entrance of the tunnel which is be-

\*\*\*\*\*\*\*\*\*

ing utilized as a medium for develop-ment work. A few days ago Cram noticed a change in the character of the rock showing in the breast of the bore and became convinced that he was in the vicinity of a ledge but that it lay to the south. Crosscutting over a distance of 15 feet he reached the contact and has now entered the ledge for three feet. The entire product is good mill dirt and at times shows a

ittle free gold.
In character the quarts resembles that mined on the Consolidated Extension, showing, perhaps, a greater amount of oxidization. It is filled with bug holes, and wherever this condition occurs, gold shows in the free, The ledge has an almost due east and west trend has an almost due east and west trend and is entirely distinct from any lit-herto located on the property. It is the intention to follow it with the main tunnel, and to that end the course of the bore is being diverted to the on a slight angle.

#### SEYLER-HUMPHREY.

There is a marked increase of mineralization in the rock showing in the eralization in the rock showing in the breast of the drift run out from the War Eagle shaft of the Seyler-Hum-phrey estate into April Fool ground, also owned by the before mentioned company. While very hard the quartz is increasing in gold value, and pre-sents other unmistakable indications of the proximity of an ore body. Both the War Eagle and April Fool claims have sent out shipments of high grade Both at infrequent intervals, and with depth it is not unreasonable to expect a continuity of ledge and precious metal

#### TO INSPECT PROPERTY.

#### Officers of Yankee Consolidated Reach City From East.

John E. Dubois and Charles J. North of New York City, respectively president and director of the Yankee Consolidated Mining company, reached the city yesterday from the east. They will attend the regular monthly meeting of directors of the company and will later make a tour of inspection of the property.

#### STRIKE IS RUMORED.

#### Blue Bull Shares in Demand But Presence of Pay Rock Still Uncertain.

The shares of the Blue Bull company, with properties in the Goldfield dis-trict, have advanced very rapidly lately and, according to recent advices, re-ports of a strike on the estate have been current, but those in a position to know say that no pay rock has yet been found. In the Crosser and Terrell lease on the Hat a sulphide dyke has been crossent 40 feet but the best assays obtained on the stuff so far has not run better than a few dollars. The lessees are confident of finding a shoot, however, and will continue the cross-cut until the crosscut is reached. The company is sinking a compart-

ment shaft near the center of the group and it is the intention to prospect the territory also with the diamond drill in use on the Laguna,

#### ORE SHIPMENTS.

#### Mohawk Holds Record of Goldfield Producers for Week

Ore shipments from Goldfield for the week ending Friday amounted to 3,533 tons, of which the Mohawk sent out 2,982 tons. Of the list appended the Nevada-Goldfield Reduction company handled 2,129 tons, from the Curtis Mohawk, Frances Mohawk and Truett, and the Ish Sheets lease on the Combination and the Florence Leasing company.

The output was divided as follows:

Source.	Lons,

#### STRONG COMBINATION.

Local Mining Men Organize Large Company to Operate in Ely District.

One of the strongest combinations of capital claiming Salt Lake for its home is that now being perfected by Sena-tor Kearns, David Keith and Col. E. A.

The property of the new company will be that in the Ely district recently acquired by purchase by Messrs. Keith and Kearns, and the incorporation will probably take place within a short

The new company when ready for business will own one of the largest and richest acreages in the district, namely, richest acreages in the district, namely, a strip 4,000 feet long of the famous Ely monzonite zone, the heavy mineralization of which has been a never ending source of wonder to mining men ever since its discovery. In addition three large fissure veins cut the limestone bordering the monzonice. The the east lies the Chainman group of the Nevada, Consolidated company.

Nevada Consolidated company. Considerable development work has already been done on the property, and the results have been such as to justi-fy the belief that eventually one of the foremost mines of the district will result. Two shafts are now being sunk in the Monzonite, one of which has encountered copper sulphides at a depth of 75 feet, showing 4 per cent of

the red metal.

In addition to the mineral land, the combination has also secured agricultural land in nearby proximity to the extent of 1,200 or 1,300 acres, part of which is covered by a deep lake a mile wide and a quarter of a mile in length, fed from numerous flowing springs. which are practically inexhaustible.
With a pientiful water supply assured, a first class property, pienty of money and the experience of years back of the whole, it will be strange if the new company does not leave its mark on the mining history of Nevada

# MINES OF PIOCHE **ARE LOOKING WELL**

E. A. Hodges in the City on Business Discusses Camp Conditions.

MUCH MACHINERY GOING IN.

Rails for New Road Are Now Piled up At Caliente-Ties Expected

F. A Hedges, of Pioche, Nev., and well known in Pioche business and mining circles, is in the city for a few days on business.

Mr. Hodges is here for the purpose of purchasing a stock of general merchandise with which he proposes to go into business in his town. In discussing the mining situation there he said.

'Pioche as a camp is picking up rapidly. Activity is apparent on every hand and general business conditions both in and out of mining where perhaps never better. The Utah Nevada Mines and Smelters corporation has re-timbered their Meadow Valley No. 5 shaft to a depthe of 1,000 feet and are continuing right along with the inten-tion of completing the timbering to the 1,300 level. A lot of work is being done on the 1,000 foot in the way of fixing up timbering, etc., and the mine is practically ready to begin shipping any

Lloyd and Cook are now shipping ore Lloyd and Cook are now shipping ore from the Poor Man property and Cook will reach Salt Lake tomorrow, when he will purchase a gasoline hoist for the Mendha mine. This last property is a very valuable one and contains an immense tonnage of ore. The mine was worked in the old days but under then existing conditions ore running then existing conditions ore running \$40 a ton was passed up as not being worth bothering about. The ore now being taken out goes 1½ ounces of gold, 10 per cent lead and 15 ounces of silver and there is 1.000 tones of this silver, and there is 1,000 tons of this ore on the dump now. Twenty-five to 30 men can be put to work in this mine and every man can work on ore. Where in the old days it used to cost \$25 a ton for smelting the charge is

now around \$6.

Among the recently lucky in the camp Among the recently lucky in the camp is a newspaper man named Gordon, who has a property from which he is now preparing a shipment. Some of the ore from this property runs \$1.00 a pound, but of course he has not got a great deal of that.

The Ohio-Kentucky people are now working three shifts of men and are staking a shaft. They expect to en-

working three shifts of men and are sinking a shaft. They expect to en-counter ore at a depth of 200 feet, which it will probably take them about 60 days to make. This property was also a mine in the old days, but on account of the expense of working was aban-

Supt. Earls has just completed the installation of a new skip and recently installed a new hoist. With the addi-tional facilities afforded by this new machinery work will now progress rapidly.

At this time nothing definite can be said with regard to the railroad, although there is a well defined opinion that work will begin in the near future. There are now rails enough at Caliente to build the entire branch and the ties for the work are expected to begin arriving shortly. Just how long it will take to build the road after the material is on the ground is somewhat of a question, but the start will probably not now be greatly delayed."

Mr. Channing was accompanied by Mr. Channing was accompanied by Mr. C. A. Molson, the well known mining engineer.

#### MR. CHANNING GOES EAST.

Utah Consolidated's Manager Will Confer With Executive Officers.

R. H. Channing, Jr., general manager of the Utah Consolidated Mining com-pany, departed for the cast this after-noon and probably will be absent several weeks, during which time he will confer with the executive department of the company in New York. No doubt the smelter smoke situation as it applies to the Utah Consolidated will 

#### DAY ON CHANGE.

Business Above Average and Market Generally Strong.

This morning's business on the floor of the local exchange was considerably above the average, and a generally healthy tone prevailed. Several stocks gained a point or two.

Carisa, Lou Dillon and Nevada Hills shared in the general activity, at prices varying but little from those of yester-day. The bulk of the day's business was in Utah stocks on the open board. The quotations fo rthe day closed as

Cedar Property in Beaver County Looking Well-Teams Scarce.

Herman Barnett, manager of the Beaver county mines of the Cedar com-Beaver county mines of the Cedar com-pany, came up from camp yesterday morning. Mr. Barnett has just made a trip to the Rhyolite and Bullfrog, stopping off at the Cedar on his way back.

He states that another car of fine ore is ready for shipment from the Ce-dar and the work of hauling it to the loading station on the San Pedro will be commenced just as soon as teams be commenced just as soon as teams enough can be secured for the work. As soon as the Talisman property, which adjoins the Cedar, gets under way it is possible that the managements of the two companies will get together and arrange for the steady employment on a joint arrangement of a string of teams for hauling ore,

Mr. Barnett says the Bullfrog country is booming, and has more solid foundation on which to build a boom than most camps of its kind.

### CONCENTRATES.

George Bemis is at present absent in Bingham on business.

Ernest Bamberger, manager of the Daly West Mining Co., will leave for the east tomorrow to be absent several Thompson Campbell, who is manager

of the antimony mines at Coyote Creek, in Garfield county, will hereafter make his home in Salt Lake instead of Butte, as formerly. M. F. Murray and Ole Oleson of the Log Cabin mine in the Gold Mountain district, passed through the city yes-terday enroute for the camp from Corlorado.

Capt. D. MacVichie and President E. L. White of the Bingham Consolidated left for California yesterday, where they will inspect the Balakialla prop-

# **VERY ACTIVE**

Prices Were Higher and Dealings Were on an Expensive Scale.

#### MANY STOCKS WERE DEALT IN.

Profit-taking Had Effect on the Advance, Most Favorites Recovering to High Prices.

New York, Nov. 14.-First prices of stocks followed London quotations to a higher level. The trading showed considerable animation and gains were substantial. Anaconda rose 4 points, Northwestern 2 and Great Northern preferred 14. Reading and Canadian Pacific gained a point and Southern Pacific, Union Pacific, Brooklyn Transit, U. S. Steel and Amalgamated Copper large fractions. Stocks were purchased on a liberal

scale, the demand embracing all of the well known railroads and specialties. There were very heavy dealings in St. Paul. Reading and Union Pacific. After these stocks and a number of others had risen between 1 and 2½ points, profit-taking sales appeared and there was a good fractional reaction, followed by a rise to a higher level than before. St. Paul moved up 2½, Reading and Great Northern preferred 2½, Northern Pacific and Delaware & Hudson 1½, Union Pacific, Southern, L. & N., D. & R. G. preferred, People's Gas 1½, Pressed Steel Car and Locomotive preferred 1¼, and Pennsylvania, Amalgamated Copper, Brooklyn Transit, Colorado Fuel, Lead and American Carl, Chicago, St. Paul, Minneapolis and Omaha preferred sold at a decline of 3.

Operations for the advance were shifted into the Hill stocks, while the earlier favorites were inclined to react on profittaking. The volume of business showed a notable shrinking from that of the first hour. Great Northern preferred ranup 3¾. Northern Pacific 2¾, and Louisville & Nashville, Smelting and Virginia Iron 2, Pacific Coast declined 2 and International Power 4.

Bonds were steady.

Most of the favorite stocks recovered to the high prices of the morning, but there were frequent relaxes when profit was sought. St. Paul and the Pacifics seemed to yield most readily under the selling.

St. Paul was bought and advanced to scale, the demand embracing all of the

was sought. St. Faul and the Faches seemed to yield most readily under the selling.

St. Paul was bought and advanced to 1794, a gain of 3 points. The general market was sluggish, but firm in tone.

The market close danimated and buoyant, St. Paul continued to rise buoyantly an extreme 7%. The other Pacific responded with more moderation but the general list was less affected. Southern Pacific gained 2%. Union Pacific, 2%. Northern Pacific 3%. Great Northern preferred 4½ and Anaconda 7.

#### PRODUCE. CHICAGO.

Chicago, Nov. 14.—Although prices at Liverpool were somewhat higher today, they falled to reflect fully the strong advance of yesterday on the local exchange and the prices of wheat in consequence weresomewhat easier at the opening. The northwestern receipts still continue light and this held the market fairly steady December opened a shade to 1/201/4 lower at 73% to 74, sold at 74% and declined to 73%.

at 73% to 74, sold at 74% and declined to 73%.

The corn market was steady chiefly because the local receipts were somewhat smaller than had been estimated. December corn opened unchanged to a shade higher at 42% to 42% 442%, sold at 42% and declined to 42%.

Trading in oats was very quiet and the market was steady. December opened a shade higher at 34% and sold at 34%.

Provisions market was very quiet but prices were firm because of the small receipts of live hogs at western packing centers. January pork opened 5 cents higher at 14.2% lard was unchanged to 2% higher at 8.42% and ribs were 2% 475 highere.

## WOOL.

ST. LOUIS

St. Louis, Nov. 14.—Wool, steady. Territory and western mediums, 24@27; fine mediums, 18@21; fine, 14@17. BOSTON.

Boston, Nov. 13.—The wool market is firm and active. The individual sales of territory now being made range from 100,000 to 500,000 pounds, and most houses have a part in this business. There is a steady call for staple Oregons, and there is a continued large movement in territory wools of all grades but quarter-bleods. More interest is shown in pulled wools. Foreign grades are firm, Quotations: California—Scoured basis; northern choice, 67@68; northern good, 65@66; middle county, 63@66; southern, 62@63; fall free, 56@57.
